Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Schiffner (U.S. Patent No. 5,861,123).

Concerning claim 2, Schiffner discloses a method for disinfecting turbid liquids (as disclosed in column 2, lines 59-65) which comprises:

(a) providing an enclosed sealed cartridge (As disclosed in column 4 lines 29-40, the grids (24a and 24b) provide a seal for the enclosed cartridge (12)) which has an air inlet (14) and turbid water inlet (18) at one end thereof (column 4, lines 15-23),

(b) providing an air stream sufficient to aerate and move said water adjacent a source of UV radiation (column 6, lines 66-67), contained within said cartridge as disclosed in column 3, lines 2-9;

(c) continuing said process for a time sufficient to disinfect said water as disclosed in column 10, lines 4-15; and

(d) recovering said treated water in a water collection means as disclosed in column 9, lines 64-66.

Art Unit: 1744

Concerning claim 1, in column 3 lines 2-9, Schiffner also discloses the fan (46) is an aerating source that aerates a source of turbid water with an air stream to diffuse, dilute and reduce the opacity of the water concentration through the aeration process. More specifically, the turbulent fluidized bed within the container provided by the gas and liquids interacting is an aeration process. The other limitations of this claim are met as disclosed in reference to claim 3.

Regarding claim 3, the liquid stream is diffused by the nozzle (27) which dispenses the liquid in droplet form as is also disclosed by Schiffner in column 5, lines 43-47. Once again the turbulent fluidized bed is an agitation and suspension of the droplets in an air stream as disclosed above. The other limitations of this claim are met as disclosed in reference to claim 1. Regarding claim 4, the limitations for this claim have been met in reference to claims 1-3, therefore claims 1-3 are relied upon in reference to claim 4.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kevin C. Joyner whose telephone number is (571) 272-2709. The examiner can normally be reached on M-F 8:00-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gladys Corcoran can be reached on (571) 272-1214. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
